Epson
P7 IBM Interface
Modules

Superior printing performance while maintaining your current IBM® hardware investment.

Epson's exclusive Connect-It™ interface technology enables you to upgrade to an Epson POS printer, improving the printing speed and performance of your existing IBM system. The Connect-It interface is an integrated, low-cost module that converts the protocol of your IBM terminals to the Epson ESC/POS® command set.
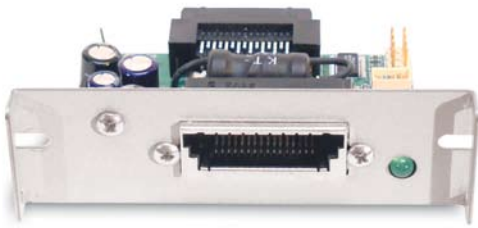

- IBM Model 3/4® emulation and 4610 Native mode support
- Legacy system investment protection
- No external power supply needed
- Uses existing IBM printer cable
- Stored graphic logos in non-volatile printer memory
- Easy installation

Ease of use
Epson printers with Connect-It interfaces are easy to install. Simply disconnect your old printer and connect your new Epson printer to the existing IBM interface cable and you're ready to print. It doesn't get any easier than that!

Standard functional operation
The Epson P7 module uses a micro-controller to convert IBM printer operations into Epson ESC/POS codes. Power supplied by the IBM host machine is transformed into the voltage required by the Epson printer. The Epson P7 module supports model 3/4 and 4610 Native mode printer commands, status requests, and diagnostics.

Electronic journal option
Save time, resources, and money. The electronic journal captures all transaction data and stores them electronically. This allows remote retrieval by the host or back office computer for processing and archiving. No need to waste time purchasing, replacing or storing paper journal rolls.

Ready for the future
Epson technology is a wise investment in your future point-of-sale solution. Today, Epson printers with Connect-It interfaces will significantly improve your printing performance. And tomorrow, Epson printers will be ready to move to your next POS terminal by simply replacing the modular interface. Designed to support the leading industry standards, your Epson printers will continue to deliver a high quality, reliable and cost-effective migration path to your future POS system.
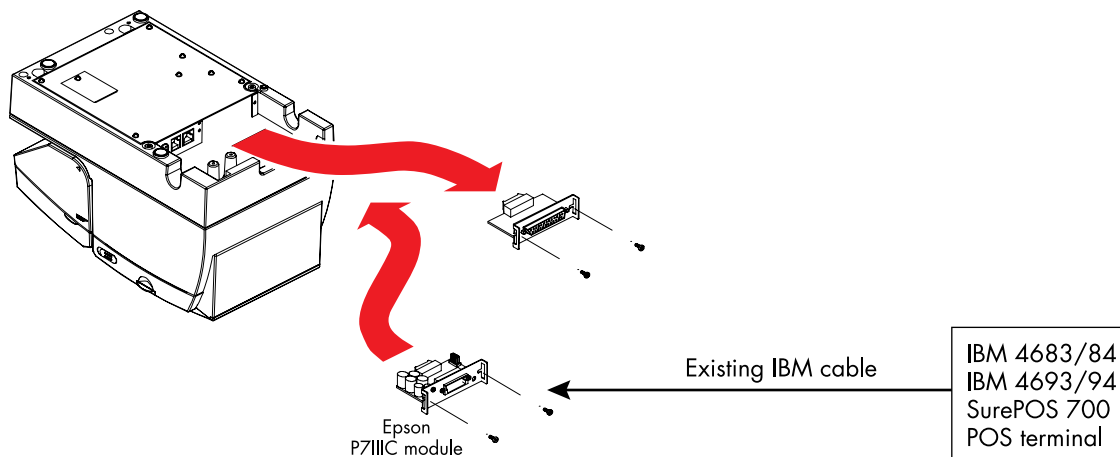

EPSON®
EXCEED YOUR VISION

Epson P7 Modules

Connect-It Interface Specifications	
Systems Supported	IBM 4683, 4684, 4693, 4694, SurePOS 700
Protocol & Commands	IBM SI/O protocol and commands are converted to ESC/POS
Connectivity	Standard P7 interface
Power Supply	Uses existing IBM terminal power supply
Connector	16-pin SEMCON-type, compatible with existing IBM printer cable
Electronic Journal Option*	2 MB (approximately 6½ rolls of journal)

*Larger capacities available on request

Example of connection with Epson's TM-H6000III

Existing IBM cable

Epson
P7IIIC module

IBM 4683/84
IBM 4693/94
SurePOS 700
POS terminal
